

ACKNOWLEDGEMENTS

The updated Malaria Mekong III monograph would never have been accomplished without the generous time and careful thought provided by the many members of Health Ministries and Malaria Programs, National and Regional Institutes of Mekong countries.

The active involvement of WHO Regional Offices (SEARO and WPRO), President's Malaria Initiative and staff from WHO country offices in data collection, analysis and cross checking of information has been highly invaluable and is gratefully acknowledged. Anna Schuetzenberger was helpful to finalize graphs and references during her internship in the WHO-MMP program.

Authors and contributors acknowledge the financial support from the President's Malaria Initiative / United States Agency for International Development (PMI/USAID) and the Bill & Melinda Gates Foundation to publish this document.
