\textsuperscript{1}Center for Chinese Agricultural Policy, Institute of Geographical Sciences and Natural Resources Research, Chinese Academy of Sciences, Beijing; \textsuperscript{2}University of Chinese Academy of Sciences, Beijing; \textsuperscript{3}Center for Experimental Economics in Education, Shaanxi Normal University, Xi’an, China; \textsuperscript{4}Department of Agricultural and Resource Economics, University of California, Davis, USA; \textsuperscript{5}State Key Laboratory and Division of Preventive Ophthalmology, Zhongshan Ophthalmic Center, Sun Yat-sen University, Guangzhou, China; \textsuperscript{6}ORBIS International, New York, USA; \textsuperscript{7}Stanford University, Stanford, USA

In the \textit{Southeast Asian Journal of Tropical Medicine and Public Health} 2014; 45(6): 1464-1473, the word “Optician” in Table 2, 2\textsuperscript{nd} line, of the above article was inadvertently misspelled, the corrected spelling is as follows:

\begin{table}[h]
\centering
\begin{tabular}{lcc}
\hline
\textbf{Unit} & \textbf{Weighted average} \\
\hline
Level of education & Years & 12 \\
Optometry certification (advanced or higher) & Percent & 46 \\
Optician certification & Percent & 30 \\
\hline
\end{tabular}
\caption{Private vision care professionals.}
\end{table}
