|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Late-stages <i>P. falciparum</i> antigen lysate-induced phenotypic changes associated with myeloid dendritic cell maturation via toll-like receptor 2 .....                                    | 507 |
| ..... S Loharungsikul, N Onlamoon, K Pattanapanyasat, N Pitabut, S Khusmith                                                                                                                    |     |
| Endoscopic management of biliary fascioliasis and identification of <i>Fasciola</i> fluke based on mitochondrial DNA: a case report from Thailand .....                                        | 524 |
| ..... P Tippawangkosol, J Saingamsook, P Kijdamrongthum, N Thinrungrroj, K Jariyawat, P Somboon                                                                                                |     |
| <i>Demodex</i> species positivity among patients with cancer, on hemodialysis and with diabetes mellitus .....                                                                                 | 532 |
| ..... FY Mutlu, ZT Cengiz                                                                                                                                                                      |     |
| A human immunodeficiency virus infected <i>Toxoplasma</i> seronegative patient with presumed toxoplasmic encephalitis: a case report and literature review .....                               | 538 |
| ..... C-Y Lee, T-Y Wu, H-C Tsai                                                                                                                                                                |     |
| <b>Research note.</b> Isolation of tembusu virus from <i>Culex quinquefasciatus</i> in Kanchanaburi Province, Thailand .....                                                                   |     |
| ..... N Nitatpattana, C Apiwatanason, K Nakgoi, S Sungvornnyothin, J Pumchompol, D Wanlayaporn, K Chaiyo, V Siripolvat, S Yoksan, J-P Gonzalez, W Wajjwalku                                    | 546 |
| Detection of nonspecific esterase activity in organophosphate resistant strain of <i>Aedes albopictus</i> Skuse (Diptera: Culicidae) larvae in Yogyakarta, Indonesia .....                     | 552 |
| ..... B Mulyaningsih, SR Umniyati, T Hadianto                                                                                                                                                  |     |
| Behavioral response of house fly, <i>Musca domestica</i> L. (Diptera: Muscidae) to natural products .....                                                                                      | 561 |
| ..... S Upakut, KL Sukontason, N Bunchu, RM Pereira, K Sukontason                                                                                                                              |     |
| Acute hepatitis E infection presenting as fever and maculopapular rash: a case report .....                                                                                                    | 570 |
| ..... V Choovichian, V Luvira, C Kittitrakul, Y Wattanagoon, P Wichianprasart, T Chanmanee, S Louisirotnachanakul                                                                              |     |
| Development of enzyme-linked immunosorbent assay for human leptospirosis serodiagnosis using <i>Leptospira</i> secretome antigen .....                                                         | 576 |
| ..... S Maneewatcharangsri, O Reamtong, T Kalambaheti, P Pumirat, M Vanaporn, D Limmathurosakul, C Thavornkuno                                                                                 |     |
| <i>Rickettsia</i> species among ticks in an area of Japan endemic for Japanese spotted fever .....                                                                                             | 585 |
| ..... M Kondo, K Ando, K Yamanaka, H Mizutani                                                                                                                                                  |     |
| Prevalence of $\beta$ -lactamases in enterotoxigenic <i>Escherichia coli</i> clinical isolates collected in Cambodia, Kenya, Nepal, Thailand, Uzbekistan, and Vietnam, from 2001 to 2010 ..... | 590 |
| ..... W Nirdnoy, P Kietsiri, O Sethabut, K Poramathikul, S Ruksasiri, A Srijan, KR Margulieux, L Bodhidatta, BE Swierczewski, CJ Mason                                                         |     |
| Isolation and characterization of New Delhi metallo- $\beta$ -lactamase 1-producing <i>Enterobacter cloacae</i> clinical strain in Chongqing, China .....                                      | 604 |
| ..... J Zhao, Y Chen, Q Sun, F Shi, J Yang, W Huang                                                                                                                                            |     |
| Antiviral, antifungal and antibacterial activities of the Chinese medicinal plants, <i>Houttuynia Cordata</i> , <i>Lobelia chinensis</i> and <i>Selaginella uncinata</i> .....                 | 616 |
| ..... NW Sit, YS Chan, BL Chuah, RJ Cheng, WM Leong, KS Khoo                                                                                                                                   |     |

|                                                                                                                                            |                                                                                                                                                     |     |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Cost of acute care for ischemic stroke in Thailand .....                                                                                   | N Sribundit,<br>A Riewpaiboon, U Chaikledkaew, JF Stewart, T Tantirittisak, S Hanchaipiboolkul                                                      | 628 |
| Epidemiology and trends of important pediatric healthcare-associated infections at Siriraj<br>Hospital, Thailand .....                     | NW Asanathong, Y Rongrungreung, S Assanasen, V Pumsuwan, N Wiruchkul,<br>K Lapphra, W Phongsamart, O Wittawatmongkol, N Kongstan, K Chokephaibulkit | 641 |
| Relationship between glucose-6-phosphate dehydrogenase deficiency and <i>ugt1a1</i> genotypes<br>in neonates with hyperbilirubinemia ..... | N Khemtonglang, S Kitcharoen, P Kiatchoosakun, S Dechyothin, C Kleesuk                                                                              | 655 |
| Six-month exclusive breastfeeding among Myanmar migrants in Samut Sakhon Province,<br>Thailand .....                                       | S Pitikultang, MM Khin, S Siri, P Taechaboonsermsak                                                                                                 | 662 |
| Applying a novel approach to improving the safety of drinking water and ice production in<br>Phetchabun Province, Thailand .....           | B Anusornpanichakul, N Kessomboon, G Borlace                                                                                                        | 674 |
| Changes in nutritional status among Malaysian adults population from 2003 to 2014 .....                                                    | A Baharudin,<br>MH Ahmad, NAM Zaki, KC Cheong, R Salleh, SM Sallehuddin, CY Ying, NA Ahmad                                                          | 682 |
| Fluoride content of commercially available ready-to-drink tea in Bangkok, Thailand .....                                                   | P Rirattanapong, O Rirattanapong                                                                                                                    | 690 |
| Multiple imputation technique: handling missing data in real world health care research ...                                                | R Suphanchaimat, S Limwattananon, W Putthasri                                                                                                       | 694 |
| Errata .....                                                                                                                               |                                                                                                                                                     | 704 |
