THOHUN-National Coordinating Office, Tranakchit Harinasuta Building, Faculty of Tropical Medicine, Mahidol University, Ratchawithi Road, Bangkok 10400, Thailand

In order to ensure sustainability of One Health Workforce (OHW) development and to enhance the capacity of THOHUN trainers to become true multidisciplinary and multi-sectoral One Health leaders in Thailand, such leaders need to be groomed to carry out THOHUN'S goals. Through a Training of Trainers (TOT) platform, THOHUN has created a multidisciplinary group of trainers capable of delivering One Health Short Course and One Health Core Competency (OHCC) Curriculum Mapping workshops. The leadership development program aimed at continuing the success of the TOT platform while strengthening leadership capabilities (including soft skills such as systems thinking, facilitating/training and coordinating) among current THOHUN trainers into true One Health leaders (Fig), while increasing the number of One Health leaders who will facilitate the development of Thailand OHW in both the academic and government sectors. The training was conducted by two private entities: Motivational Training Institute and SGS.
